

Soldering Kit with Digital Soldering Station, 60W

Termékleírás

HT2C312 is a modern soldering station designed for precise, safe and comfortable operation. It combines high power with digital temperature control and smart features that increase efficiency and safety when soldering and repairing electronics.

Product Features:

- 60 W power – fast heating and temperature stability. It enables smooth operation and precise soldering of both small SMD components and larger components.
- Digital temperature control (100-500°C) - settings with an accuracy of 1°C allow you to adjust the parameters to the specific task. Three predefined modes (200°C, 300°C, 400°C) make it easy to switch quickly.
- LCD display - informs about the current and set temperature, with the possibility to choose the unit °C or °F.
- Auto Sleep function (after 10 min) - automatic temperature reduction to 200°C extends the life of the tip and reduces energy consumption.
- Auto OFF function (after 30 min) - automatic shutdown of the device increases work safety.
- Antistatic design (ESD Safe) - protects fragile electronic components from electrostatic damage.
- Integrated stand with space for a cleaner and sponge - helps keep your workplace tidy and provides convenient access to accessories.
- Accessory set included - 5 interchangeable tips and soldering tin (1.5 mm) allow you to start working immediately after unpacking.

Application:

Precision soldering of SMD and THT components

- Repair and modification of printed circuit boards and electronic circuits
- Modeling and hobby work
- Creation and maintenance of small electronic devices

Technical parameters:

- Power: 60W
- Temperature range: 100-500°C
- Voltage: 110-240V~50/60Hz
- Display: Digital LCD
- Station weight: 0.8 kg

Directions for use:

- Work in a well-ventilated room.
- Place the soldering iron on the stand when not in use.
- Clean the tip regularly with a damp sponge or metal cleaner.
- When you are finished, disconnect the appliance from the power supply and allow it to cool down.

Jellemzők

- 60W power and 100-500°C digital temperature control
- LCD display;
- Auto Sleep and Auto OFF functions;
- Antistatic design (ESD Safe)
- 5 tips and tin included.
