

18V Multifunction + 2Ah Battery

Product description

A versatile and efficient multifunctional device for grinding, stripping and plunge cutting, among others. plasterboard and ceramic boards, metal, wood, plastic. Perfect for sanding workpieces, cutting skirting boards, pipes, tiles, removing adhesives, mortars and paint coatings. Suction guard increases comfort and safety of work during grinding High rotational speed of 5000-19000 m-1 and 3° oscillation enables faster and more efficient work. Durable, metallic housing of the gearbox excellently dissipates heat, making the device more efficient and robust. Gearbox made of metal enhances the wear resistance and ensures precision of the mechanism. The additional handle enables rapid and comfortable replacement of the equipment, without the need to use additional tools. Smooth adjustment of the rotational speed provides full control over the conducted operation. Thermal safety device protects the tool against overheating during operation. Small circumference of the body enables more secure grip of the power tool, and the soft handle dampens vibrations during operation. The built-in, powerful LED torch illuminates the work areas perfectly. OneAccuSystem 18 V enables using the selected battery in a wide and diverse range of power tools for the most heavy-duty work.

Characteristics

- Equipment: sanding pad, sandpapers, suction guard, scraper.
- Handle – quick, tool-free.
- Rotational speed: 5000-19000 m-1.
- Oscillation: 3°.
- Metal gearbox housing.
- Metal gearbox mechanism.
- LED light.
- Smooth speed adjustment.
- Anti-vibration, soft handle.
- Device overheat protection.
- Weight – 1.1 kg.
- The rechargeable battery to be purchased separately.
- EAN code – 5902801441769.
- 3 years warranty.
- OneAccuSystem.
- Voltage – 18 V.
