

PRODUCT INFORMATION SHEET

Pruning shears for 18V

Product description

OneAccuSystem 18V cordless pruning shears Cordless pruning shears for quick and precise pruning of branches, shoots and shrubs. Designed for maintenance work in gardens, orchards and in the maintenance of green areas. Battery power significantly reduces user effort and allows you to increase your work efficiency many times over compared to hand tools. The pruning shears are equipped with a safety system that stops the blades when contact with the hand is detected, reducing the risk of injury. The lightweight design and ergonomic handle allow comfortable work even during longer work cycles. Interchangeable blades increase the tool's durability and allow it to be used for a long time. Adjusting the blade opening allows you to adjust the working range to the thickness of the branch, which improves control over the cut and affects its cleanliness. Key features: 18V battery power for cordless freedom of operation. Maximum cutting diameter up to 30 mm (soft branches). Brushless motor. High work efficiency – even several times faster cutting compared to manual pruning shears. Blade opening adjustment to suit the thickness of the branch. Hand protection system that automatically stops the blades when contact is detected. Ergonomic design and low weight (approx. 1050 g) to reduce user fatigue. Short charging time and long runtime on one cycle. Blades can be replaced, increasing tool life. Technology and performance: The brushless motor and control electronics used ensure stable operation and constant cutting force, and the charging control system protects the battery from overheating and extends its life. System advantages: The OneAccuSystem 18V power supply provides full mobility and compatibility with a wide range of power tools, allowing you to use a single battery in multiple devices. Battery and charger available for purchase separately. Warranty: 3 years of protection with Door to Door Service – less downtime, more confident in use.

Characteristics

Maximum cutting diameter: up to 30 mm. Motor Power: 500W Brushless motor. Blade opening adjustment. Hand protection system – automatic blade stop. Clean and precise cutting conducive to plant regeneration. Lightweight and ergonomic design. Interchangeable blades. Operating time: approx. 2.5-3 hours (depending on battery). Charging time: approx. 1.5-2 hours.
