

Pressure washer kit with 2ah battery and charger

Opis Produktu

The Högert Technik HT2E286 cordless washer is designed as a mobile device for light to medium-sized cleaning work in home, garden and recreational environments.

The biggest advantage of this model is **full independence from the water system**. The washer **does not need to be connected to running water** – just immerse the suction hose in any tank, such as a bucket, barrel, rainwater tank or canister. Thanks to this, the device will work well wherever access to the tap is difficult or impossible.

The battery power of the **OneAccuSystem 18V** system provides the freedom to work without cables and allows the use of a single battery in multiple Högert Technik tools.

Operation without water – maximum mobility

The washer draws water in suction mode:

- the
- suction hose should be completely immersed in the water tank,
- a **pre-filter** is installed at the end of the hose, which protects the pump from contamination,
- When started, the device automatically sucks in water and starts working.

This solution allows you to use the washer:

- on the plot,
- in the garden,
- at the campsite,
- when washing bicycles, sports equipment, garden furniture or tools,
- without the need to supply pressurized water.

Adjustable lance and operating modes

The washer is equipped with **an adjustable lance**, which allows you to change the characteristics of the jet depending on the task:

- Spot jet for more stubborn dirt
- Diffuse jet for gentle rinsing of surfaces.

Tool-free adjustment is made directly on the work tip, allowing you to quickly adjust the cleaning method to your current needs.

Foam gun included – effective washing without scrubbing

The set includes a **foam gun** that allows you to apply active cleaning foam. This solution significantly increases the efficiency of washing m.in:

- cars,
- bicycles,

- garden façades,
- plastic furniture.

The foam evenly covers the cleaned surface, dissolving dirt and reducing the need for mechanical scrubbing.

Water filter – pump protection and longer service life

The included **suction filter** stops sand, fine debris and deposits that could damage the pump. Filter Application:

- increases the durability of the device,
- improves work stability,
- It enables the safe extraction of water from natural and temporary reservoirs.

System advantages

The OneAccuSystem 18V power supply allows it to work with other Högert cordless tools, reducing the number of batteries needed and increasing the flexibility of working in the garden.

Battery and charger available for purchase separately.

Warranty

3-year warranty with Door to Door service – safe use and fast service when needed.

Charakterystyka

- **no need to connect to running water** – water intake from any tank,
- suction hose with **pre-filter** – protection of the pump against contamination,
- **adjustable spray lance** – quick change of spray characteristics,
- **foam gun included** – effective washing without scrubbing,
- the ability to work with a bucket, barrel, canister or rainwater tank,
- ergonomic pistol grip – comfortable one-handed operation,
- compact design – easy transport and storage,
- ideal for washing bicycles, cars, garden furniture, tools and recreational equipment,
- the washer cannot be connected to running water
