

Zestaw bezszczotkowej kosiarki 32 cm z baterią 4Ah i ładowarką

Product description

Cordless lawnmower 32 cm OneAccuSystem 18V

Compact and convenient to use cordless lawnmower designed for **the care of small and medium-sized home lawns**. Battery power eliminates the need to work with a cord, providing full freedom of maneuver and easy access to hard-to-reach areas of the garden – along flower beds, trees and landscaping.

The cutting width of 32 cm allows you to precisely guide the mower in limited spaces, and the 5-stage **cutting height** adjustment in the range of **20-60 mm** allows you to adjust the length of the grass to the current conditions and needs of the lawn. The model will work well both for regular mowing and for the first mowing after a long break.

The mower is equipped with a **30-litre grass catcher**, which limits the frequency of emptying and allows you to work smoothly without unnecessary downtime. The lightweight, stable construction and low noise and vibration levels increase the comfort of use, especially during frequent maintenance work.

The **safety system** used – a safety key and a starter switch – prevents the device from being switched on accidentally. Automatic knife stop when the bar is released increases control of the mower and increases the level of work safety. The HT2E287-0LM18V32 is designed for private and hobby use, where simplicity of use, mobility and reliability are important.

Key features:

- OneAccuSystem 18V battery power for
- cordless freedom
- brushless motor
- cutting width of 32 cm for easy manoeuvring on smaller areas,
- 5-stage cutting height adjustment in the range of 20–60 mm,
- 30 l grass catcher limiting the frequency of emptying,
- safety system with a key and a switch to prevent accidental starting,
- automatic stop of the knife when the bar is released,
- low noise and vibration levels to increase the comfort of work,
- Lightweight and stable design for easy driving, transport and storage.

Technology and performance:

The optimised design and battery drive ensure stable and even work when mowing the lawn. Adjusting the cutting height allows you to adjust the way you work to the conditions of grass growth, improving the aesthetics and condition of the turf.

System advantages:

The OneAccuSystem 18V power supply allows you to use a single battery in a wide range of garden and workshop power tools, increasing mobility and reducing operating costs.

3 years of protection with Door to Door service – less downtime, more convenience of use and longer lifespan of the device.

Characteristics

- Cutting width 32 cm – easy manoeuvrability on small and medium-sized lawns.
- Brushless motor.
- Cutting height adjustment 20-60 mm (5 levels) – quick adjustment to the current condition of the lawn.
- Grass catcher 30 l – longer work without frequent emptying.
- Safety system with key and switch – effective protection against accidental starting.
- Automatic knife stop when the bar is released – more control in any situation.
- Low noise and vibration levels – comfort for regular mowing.
- Lightweight, stable design – convenient to handle, transport and store.
