

PRODUCT INFORMATION SHEET

Brushless Mini Chainsaw 18V

Product description

The Högert Technik HT2E293-0PS mini cordless saw is designed for precise garden and home work where a classic chainsaw is too large or bulky. With its compact design, low weight and one-handed operation, the tool is ideal for pruning branches, tending trees and doing small cleaning jobs around the house.

The device belongs to the **OneAccuSystem 18V** platform, which allows you to use the same batteries as in other Högert Technik garden and workshop tools. Battery power ensures full mobility, quieter operation and no exhaust emissions, which is important when working in the garden or on the plot.

The saw is equipped with a **short guide with a cutting chain**, optimized for precision work. This arrangement allows you to cut branches and wooden pieces accurately without putting excessive strain on your wrists and arms.

According to the manual, the HT2E293-0PS has a **tool-free chain tension adjustment system**, which facilitates ongoing operation and reduces set-up time. Automatic chain lubrication improves work culture and reduces wear on cutting elements.

A lot of emphasis is also placed on safety. The saw is equipped with a **switch lock**, a guide guard and a design that protects the user's hand from accidental contact with the chain. These solutions increase control over the tool, especially when working with one hand.

System advantages

The OneAccuSystem 18V power supply allows it to work with other Högert cordless tools, reducing the number of batteries needed and increasing the flexibility of working in the garden.

Battery and charger available for purchase separately.

Warranty

3-year warranty with Door to Door service – safe use and fast service when needed.

Characteristics

- Compact mini saw – ideal for precise garden work.
- Short guide and cutting chain – better control and cutting accuracy.
- tool-free chain tension adjustment – quick operation and easy maintenance.
- Automatic chain lubrication – less wear and smoother operation.
- switch lock – protection against accidental starting.
- ergonomic handle – secure grip and comfort when working with one hand.
- Low weight – less fatigue with prolonged use.
