

## PRODUCT INFORMATION SHEET

# 3 in 1 Platform Grass Trimmer Set with 2ah Battery and Charger

### Product description

The Högert HT2E296-0GTLM is a versatile garden tool powered by an 18V battery, which combines the functions of a **lawnmower with a trolley, a classic trimmer and a lawn bender**. One device allows you to comprehensively take care of your lawn – from regular mowing, through precise trimming, to aesthetic edge finishing.

Once the platform is installed, the device works like a compact lawnmower, allowing you to comfortably mow small and medium-sized lawns without having to carry the tool. When the trolley is detached, the HT2E296-0GTLM transforms into a lightweight trimmer, ideal for working around trees, shrubs, fences and landscaping. An additional side wheel allows you to **precisely edge the lawn**, guiding the device stably along edging, flower beds or pavements.

A cutting diameter of 30 cm ensures good performance while maintaining full control of the tool, while the adjustable handle and the ability to change the working angle increase the comfort of use. Battery power eliminates wires, ensuring freedom of movement and safe work anywhere in the garden.

The HT2E296-0GTLM is part of the **OneAccuSystem 18V**, which allows you to use the same battery in a wide range of Högert power tools and garden tools.

### System advantages

The OneAccuSystem 18V power supply allows it to work with other Högert cordless tools, reducing the number of batteries needed and increasing the flexibility of working in the garden.

Battery and charger available for purchase separately.

### Warranty

3-year warranty with Door to Door service – safe use and fast service when needed.

### Characteristics

- **3-in-1** function: lawn mower with trolley, trimmer and bending machine,
- cutting diameter **30 cm** – optimal for home gardens,
- a mobile platform that makes it easier to mow larger areas,
- side wheel for **precise lawn edging**,
- Adjustable handle height and angle for better ergonomics
- low weight and good balance – less fatigue during work,
- low noise and vibration levels for increased user comfort.
