

Opis Produktu

The Högert Technik HT2E297-0BCLT cordless scythe is designed for lawn care, trimming hard-to-reach areas and cutting denser vegetation in home and garden conditions. Battery power in the **OneAccuSystem 18V** ensures full mobility and cordless freedom, and the ability to use different cutting tools allows you to adapt the device to the task at hand.

The device offers **two interchangeable working heads** – a trimmer head and a cutting blade – which significantly increases its versatility. In combination with the **speed control**, the user can precisely select the operating parameters for both gentle grass trimming and more demanding cleaning work.

Two cutting heads – to match the type of work

The **trimmer head** is designed for:

- mowing grass,
- trimming at the edges,
- work near trees, fences and elements of small architecture.

According to the instruction manual, the scythe works with a **cutting line with a diameter of 2.4 mm**, which ensures good durability and cutting efficiency while maintaining precision. The working diameter of mowing with the line is **330 mm**, thanks to which the device works well on larger areas of lawn.

The **255 mm diameter cutting blade** is designed for:

- tall and compacted grass,
- weeds,
- denser vegetation and light thickets.

The use of a metal blade allows you to effectively deal with where a standard line is not enough.

Speed control – control and efficiency

The HT2E297-0BCLT is equipped with a **speed control** to match the power to the type of cutting tool and operating conditions:

- for **line head**: 4000 / 5000 / 6200 rpm
- for **cutting blade**: 4200 / 5200 / 6700 rpm

Lower rpm works well for precision finishing work, while higher rpm ensures effectiveness in dense vegetation. This improves tool control, reduces energy consumption and reduces the load on the motor.

Comfort and safety at work

The ergonomic design, adjustable auxiliary handle and proper balance of the device increase the comfort of work, even during prolonged use. The cutting unit guard protects the operator from kickback of the cut material, and the switch lock prevents the tool from being started accidentally.

System advantages

The OneAccuSystem 18V power supply allows it to work with other Högert cordless tools, reducing the number of batteries needed and increasing the flexibility of working in the garden.

The scope of delivery includes a 4 Ah battery (HT2E240-A40) and a 4A charger (HT2E242-A40).

3-year warranty with Door to Door service – safe use and fast service when needed.

Charakterystyka

- **two cutting heads:** a line and a metal blade.
- **cutting line with a diameter of 2.4 mm.**
- cutting diameter with a fishing line: **330 mm.**
- Cutting blade diameter: **255 mm.**
- **speed control** – matching the power to the task.
- ergonomic handle and cover for the cutting unit.
