

Grass shears 18V

Product description

The Högert HT2E298-0GS cordless shears are a compact and handy tool designed for the precise care of lawns, green edges and low shrubs in home gardens. Powered by **OneAccuSystem 18V**, the device offers full portability and cordless convenience, ideal for where control and accuracy are important.

The HT2E298-0GS features a **quick-change blade system** that allows you to easily adjust the tool to the task at hand. There are **two types of blades** available to the user:

short – designed for precise trimming of grass, lawn edges and hard-to-reach places,

long – dedicated to forming and caring for low shrubs and hedges.

The blades are made of steel for a clean cut and are designed for quick changes without the need for additional tools. The ergonomic handle with soft grip zones improves control of the tool and reduces hand fatigue during extended work.

The shears are designed as a tool for care and finishing work – ideal for places where a classic lawn mower or larger shears are impractical.

System advantages

The OneAccuSystem 18V power supply allows it to work with other Högert cordless tools, reducing the number of batteries needed and increasing the flexibility of working in the garden.

Battery and charger available for purchase separately.

Warranty

3-year warranty with Door to Door service – safe use and fast service when needed.

Characteristics
