

## PRODUCT INFORMATION SHEET

### Impact socket set 10 mm - 22 mm, 3/8", 8 pcs

#### Product description

The Högert Technik HT4R087 3/8" Long Impact Socket Set is designed for professionals who need maximum durability, precision and reliability when working with impact wrenches. It is an ideal choice for mechanics, car service and industrial plants working with heavy loads.

The caps are made of highly resistant chromium-molybdenum steel (CrMo), ensuring exceptional durability even under heavy use. Thanks to their elongated design, they are perfect for hard-to-reach places and when working with deep-seated nuts. The hexagonal profile guarantees reliable torque transmission and minimizes the risk of damage to the screw heads.

The set includes the most commonly used sizes – from 10 to 22 mm – neatly arranged in a sleek metal case. This not only protects the attachment from damage, but also allows you to keep every workshop tidy.

**The HT4R087 is a tool built for power and precision and absolute reliability.**

#### Characteristics

- Made of chromium-molybdenum steel (CrMo) – the highest resistance to impact and cracking.
- Hexagonal profile – secure grip, minimizing the risk of damage to the screw heads.
- Precise machining – stable torque transmission even under heavy loads.
- Matte finish – increased grip.
- Sturdy metal case – safe storage and organization of work.
- Socket sizes: 10, 11, 13, 14, 16, 17, 19, 22 mm.
