

Diagnostic Trolley 5 drawers

Opis Produktu

The Högert Technik HT7G576 mobile diagnostic trolley is a professional tool cabinet designed for the work of car diagnosticians and modern workshops. It is perfect as a mobile work center for storing diagnostic testers, meters, interfaces and auxiliary tools.

The trolley is equipped with **5 functional drawers on ball guides**, which ensure smooth and stable operation even under heavy load. The varied height of the drawers allows for convenient organization of both small accessories and larger diagnostic devices.

The key distinguishing feature of the model is **an innovative system of security panels**, which, when opened, slide between the drawers. This solution allows you to store valuable devices without fear of theft.

The top worktop with fold-out side panels creates a practical workstation for working with a laptop or diagnostic tester, increasing the comfort of work without the need for additional tables.

The solid, steel structure guarantees high resistance to intensive use in workshop conditions, and **the central locking** allows you to secure the contents of the trolley. The whole thing is mounted on **four swivel wheels (including two with a brake)**, which allows the station to be freely moved between vehicles.

Packaging & Assembly:

- The product is delivered in a complex form

Charakterystyka

- Ideal for working with laptop, diagnostic testers, OBD interfaces and meters;
- 5 capacious drawers on ball guides – smooth and stable operation;
- Innovative security panels – slide between drawers when opened;
- Fast and full access to content – ideal for diagnosticians;
- Upper worktop – space for a laptop or diagnostic tester;
- Extendable side panels – increased workspace;
- Central locking – securing all drawers at the same time;
- 4 swivel wheels (including 2 with brake) – mobility and stability of work.
